

Knowledge for the Digital Age

e-Learning offers an affordable and easily accessible alternative to traditional classroom training.

The Siyandza e-Learning Solution is an expansive and comprehensive electronic learning package that is available to both companies and individuals. The solution includes a number of skill-libraries with over 200 different courses from which to choose. These libraries include business skills, information technology and project management.

Because it is accessed online the Siyandza e-Learning Solution is available immediately and can be utilised anywhere, eliminating

the costly process of sending employees on classroom training. Learner progress can be tracked easily and delegates are encouraged to take responsibility for their own learning. The solution offers the ideal platform for corporations looking to broaden their existing learning solution or upgrade the skills of specific staff members. It is also the ideal solution for individuals who want to increase their skills and knowledge.

*Delivering outcomes based corporate training solutions
tailored to your company's specific needs*

The Siyandza e-Learning Solution offers you the following key benefits:

- Delegates can learn at their own pace
- Delegates take responsibility for their own learning
- Training tracking is made easy
- Promotes a learning culture
- Generally, e-Learning is more cost effective than classroom training
- Can easily be incorporated into traditional classroom training for a “blended” approach to training
- Partner with your organisation for rollout and change management required for a successful e-Learning implementation

The Courses

The Siyandza e-Learning Solution allow clients to select any number of online programmes collect libraries, targeted to each skill level within an organisation or individual. Siyandza, together with the client, will discuss the libraries and agree on which will be made available.

Online learning programmes stand alone as full online learning courses and are available to users for a period of one year.

The types of courses are:

- Business Skills
- End User IT
- Advanced IT

Corporate Functionality and Implementation

The e-Learning Solution can be implemented in one of two ways.

Learner Management System Access and Tracking

Courses will be accessed, tracked and reported on, via the Siyandza Learner Management System. This solution includes all LMS functionality (training scheduling/tracking/assessment capability/score recording/link to skills audits/learner reporting etc). e-Learning forms part of the full organisational learning and development strategy.

Basic (non-Learner Management System) Access and Tracking

Courses will be accessed, tracked and reported on, via the e-Learning platform as set up locally (on the company’s server) or remotely (via the internet). Organisations receive the courses with ability to report and track on those specific courses only.

Siyandza offers a free one-week pilot demonstration of the system to ensure the solution is right for your business.

If you would like to attend an e-Learning course, or extend your company’s existing training programme to include e-Learning, please contact us.
